PRODUCT-TRAINING

Optimal usage of automatic processes with
PromasCS Batch Standard

Duration: 2 Days

**Participants:** Machine Operators, Key users, Onboarding new operators

Format: In-Person or Online - always in our PromasCS training system

Why PromasTrain?

Leverage the benefits of your automated processes! Our customized training courses enable your operators to use PromasCS efficiently and without any programming knowledge. Whether you're a beginner or an expert, we adapt our modular learning concept to your needs..

Training Content:

- Efficiently create automated processes with the intuitive process editor.

- Analyze batch reports to quickly identify optimization potential.

- Securely handle events such as alarms and operator prompts.

- Manage materials, orders, and measured values in everyday production.

- Deeper understanding of functions such as material management, order management, user management and system parameters.

Your benefits:

✓ Efficient process utilization to use PromasCS for your individual workflows.

✓ Targeted exercises for quick implementation in everyday work.

✓ Training tailored to your company and your requirements.

✓ Practice-oriented training: Our experienced trainers impart knowledge based on real-life application cases.
