Better understand processes – increase quality
OEE & Prozess Analysis

Duration: 1 Day

Participants: Production Manager, Key User

Format: In-Person or Online - always in our PromasCS training system

Why PromasTrain?

Make better decisions based on reliable data! PromasTrain gives your team the knowledge to analyze processes thoroughly, correctly interpret OEE metrics, and initiate targeted optimizations – based on facts rather than guesswork.

Training Content:

- Analysis and optimization of process runtimes down to the step level
- Identification of optimization potential using IPC trends, Gantt charts, Pareto loss analysis, and heat maps
- Evaluation of OEE metrics: availability, performance, quality rate, as well as machine and personnel times.
- Interpretation of disruption data (MTBF/MTTR) and production volumes
- Use of dashboards for KPIs or water consumption to derive targeted improvement measures

Your benefits:

- ✓ Targeted process optimization through sound analyses and key performance indicators.
- ✓ Targeted exercises for quick implementation in everyday work.
- ✓ Training tailored to your company and your requirements.
- ✓ Practice-oriented training: Our experienced trainers impart knowledge based on real-life application cases.
